5. Other documents deemed eligible to verify income

RESIDENCE VERIFICATION

1. Copy of Utility Bill
2. Lease Agreement
3. Mortgage Documents (Deed), etc.

****Other documents may be necessary as required by Agency****

Community Services Block Grant (CSBG) - CSBG is a block grant used to provide a range of services or activities designed to ameliorate the causes and effects of poverty. Such activities include attaining an adequate education, securing and retaining employment, nutrition, making better use of available income, obtaining and maintaining adequate housing, health services, achievement of self-sufficiency, community affairs, transportation and so forth. Through Community Action Agencies (CAAs) and Human Resource Agencies (HRAs), the Division of Community Services distributes CSBG funds to garner local resources and stimulate community participation into opportunities for self-sufficiency using the case management approach.

Low-Income Home Energy Assistance Program (LIHEAP) - LIHEAP is DCS's most well-known and highly utilized program. LIHEAP provides financial assistance to eligible households to help pay the cost of home energy bills and other energy related services. Benefits vary depending on the intensity level and are based on the rating tool. Households may qualify for regular LIHEAP assistance and/or the Energy Crisis (emergency) Intervention Program (ECIP) for natural gas, wood, electricity, liquid petroleum propane/butane gas, and other energy related services. The allocation of funds to subgrantees is based on the percentage of poor households in each county compared with the state's poverty level according to the current census data.

Weatherization Assistance Program (WAP) - The Weatherization Assistance Program is designed to reduce energy costs for eligible clients by making their homes more energy efficient. Weatherization focuses on assisting primarily the elderly, disabled and low-income families with young children. Energy efficiency education is provided for each household weatherized. The priority measures that can be applied to each home are based on an energy audit of the client's home. Weatherization crews install the most cost-effective, energy efficient measures, and address health and safety concerns, improve comfort and air quality.
